Deja Vu?
Why wildlife policy matters
The System

- Laws
- Institutions:
  - State agencies
  - State commissions
- Funding:
  - License fees
  - Federal grants
A New Paradigm

Wildlife For All is a national campaign to reform state wildlife management to be more democratic, just, compassionate, and focused on protecting native species and ecosystems.

- Democratic, because wildlife is held in the public trust and everyone should have a voice in wildlife decisions.
- Just, because wild animals deserve to be treated fairly as members of the community of life.
- Compassionate, because wild creatures are sentient beings worthy of our empathy and respect.
- Ecologically focused, because of the urgent need to protect species and ecosystems in the face of a global extinction crisis.

Walker-appointed DNR board broke open meetings law

By Andy - June 2, 2017

Members of the Wisconsin Natural Resources Board
Wildlife management:

1. Undemocratic
2. Unjust
3. Lacks compassion
4. Does not prioritize biodiversity protection
Hunters Control Wildlife Policy

- U.S. population (USFWS, 2020):
  - Hunters = 5%
  - Anglers = 9%

- 46 state wildlife commissions:
  - ~411 seats total
  - Hunters or anglers ≥ 70%

Wildlife is a Public Trust

- Nobody owns wild animals.
- The trust includes all wildlife species.
- The trust beneficiaries include all people
- Government is the trustee
- Trustees have a duty to protect and manage the trust for all beneficiaries, including those yet to be born.
- Trust management requires democratic governance
Hunters as Conservationists

In the late 1860s and early 1900s, wildlife was in trouble. The demand for wildlife products such as furs, game meat and feathers was at an all-time high.

Hunters supported laws to prevent over-hunting and protect the health of wildlife populations for future generations. Hunters led the way in the restoration of America’s wildlife.

Early leaders in conservation, such as Theodore Roosevelt and Aldo Leopold, were hunters. President Theodore Roosevelt established the first national parks, developed conservation programs and started the wildlife preserve program. Aldo Leopold wrote the book on modern wildlife management. His methods are still used today, and conservationists worldwide quote his books.

Conservation groups formed over a hundred years ago, and conservation groups today, support safe and ethical hunting. Many members of conservation groups are hunters. Hunters still lead the way in conservation. Millions of people hunt and also contribute to the welfare of wildlife in America through licenses and taxes on hunting equipment. Responsible hunters follow game laws and a code of ethics. Many hunters belong to conservation organizations and actively contribute time, money and effort to help wildlife populations.

Paying for Wildlife

- Hunters have contributed over $5.5 billion for conservation in less than 60 years.
- Hunters annually pay over $372 million a year for conservation.
- Hunters do more to aid wildlife than any other group in America.
Pittman-Robertson Act of 1937

- Redirected a tax on firearms to states for wildlife restoration
- Important source of funding for state wildlife agencies
- $1.1 billion disbursed in FY22
Mutual benefits:

• Hunters benefitted:
  • Solidified role of hunters as primary “users” of wildlife
  • Most PR funds used to promote game species and hunting
  • Created incentives for agencies to sell more hunting licenses

• Agencies benefitted
  • Diversion prohibition kept money with agencies
  • More licenses sold = more PR funds
Hunting has declined for decades…

• 1960: 8% of U.S. population
• 2020: 4.6% of U.S. population
While gun sales have exploded
Gun Control: the Impact on Hunting

- The fight against gun control, in general, is inseparable from the fight for the rights of hunters.

- In the United States, more than 50% of all hunters are engaged in target shooting, and 22% of hunters visited shooting ranges. (U.S. Fish and Wildlife Service, U.S. Department of the Interior, and U.S. Department of Commerce, 2012).

- Many hunters wish...

- One example of gun control laws passed in 2013 by anti-gun politicians was the banning of hunting with a .22 caliber rifle. In response, the National Rifle Association (NRA) and other groups have staged protests and rallies across the country.
How Sportsmen, Sportswomen and Industry Helped Save Wildlife Species

American hunters have the unique position of being the original conservationists. In the early 20th century, many wildlife species in the U.S. were facing an uncertain future due to unregulated over-harvesting of many species and habitat destruction. Sportsmen and women watching this unfold led the call for new approaches for the responsible management and use of these resources.
Wildlife management is UNJUST

Living Planet Index, World

The Living Planet Index (LPI) measures the average decline in monitored wildlife populations. The index value measures the change in abundance in 31,821 populations across 5,230 species relative to the year 1970 (i.e. 1970 = 100%).

Source: World Wildlife Fund (WWF) and Zoological Society of London
Note: 95% upper and lower confidence intervals are shown in grey.

1. Population: A population is a group of individuals of the same species that live in the same geographic area. A species will often have multiple or many populations, each living in a different area.
Wildlife management LACKS COMPASSION
Conservation or Game Management?

State Wildlife Agency Activities:

• enforcing hunting regulations
• administering license sales
• providing hunter safety & education programs
• recruiting more hunters and anglers
• securing access for hunting and fishing
• constructing and operating shooting ranges
• operating fish hatcheries and stocking programs
• suppressing predators to increase game populations
• acquiring and managing land
• improving habitat
• conducting research and public education
• protecting non-hunted species
• responding to complaints.
Non-Native species
KILLING WOLVES TO OWN THE LIBS?

The predators were reintroduced to the state in the nineties—and have been the object of political controversy ever since. An aggressive new law allows people to hunt or trap as many as they can.

America’s New War on Wolves and Why It Must Be Stopped

Hunting of wolves is again legal in the Northern Rockies, where running them over with snowmobiles or incubating them in their dens is now permitted. The Biden administration must stop the slaughter of these wolves and protect their recovery from the brink of extinction.

A more just future...
Guiding Principles for Reform

- Wildlife should be treated as a public trust
- Wildlife decision-making should be democratic, transparent, informed by science, and include explicit value statements
- The individual interests of all organisms to exist and thrive should be respected
- Consumptive uses and users should not be privileged
- All wild species have ecological value and should be protected as part of natural ecosystems
- The public benefits broadly from the existence of wildlife, and should share in the cost of protecting it.
Wildlife for All Goals

- Build a national coalition (and movement) of wildlife governance reform advocates
- Raise awareness about the problems with state wildlife management
- Catalyze and support state level reform campaigns
- Replace the current wildlife management paradigm
Policy Reform Goals

• revise outdated statutes and policies
• establish new, broad-based sources of funding for wildlife conservation
• abolish wildlife commissions, or reform them to be more representative
• enforce public trust duties of wildlife policy makers
Achievements

• national conference on reforming state wildlife management in 2018
• launching of campaign in 2021
• national coalition established
• conference presentations, media coverage, controversies
• better commission appointments in WA, CO, etc
• reform related bills introduced or passed in NM, MD, WA, NV, etc.
• leveraging federal initiatives to drive reform, i.e. RAWA
What You Can Do

- Empower yourself to be a multispecies justice advocate.
- Become familiar with the nuts and bolts of state wildlife governance, in general and in your state. Share what you learn.
- Build power by joining with others.
